

"WE ARE VERY SATISFIED WITH THE SMOOTH MOVEMENT AND THE CONTROL WE HAVE OVER OUR 2 AFC HEADS."

RON KRAUSE - TECHNICAL DIRECTOR

AFC 100 AND MHC SOFTWARE DELIVER IMPROVED USER EXPERIENCE

Compared to other equipment we have used, the MRMC robotics are high-quality products and the MHC software has a lot of potential for us going forward.

We recently introduced two of MRMC's AFC 100 heads into our 8-camera set-up, which we use to film services at the Grace Church in Maryland Heights, MO, as upgrades for an older PTZ system.

The single user MHC and joystick controller set-up used by our camera operators is incredibly user-friendly and works well with our dual remote cameras. It has given the operators improved control over their live moves, and produces smooth camera movements.
