

TITAN SLIDER

PRECISE CAMERA SLIDER SUITABLE FOR HEAVY CAMERAS

FULL REMOTE OPERATION
IDEAL FOR LIVE PRODUCTION
AND STUDIO OPERATION

UNIVERSAL MOUNTING
FOR GRIP SYSTEMS AND HEADS

RIGID DESIGN
PRECISE, COMPACT AND DURABLE

The TITAN SLIDER is the most precise slider available in its category. Designed with product photography or macro shots in mind - where there's no room for error - it's compact, durable and can be used by a single operator or small crew, in the studio or outdoors. Due to the stainless steel mechanism of the cart, the TITAN SLIDER allows the operator to perform smooth shots, and it easy to control with an AION IQ or Kairos controller. Take control a step further with automation delivered via MPMC's Polymotion Chat software.

FEATURES

- Extremely quiet, perfect for studio productions.
- Can be manually or power operated.
- Choice of control options, via AION, KAIRO or Polymotion Chat.
- Combine multi-ple sliders, one on top or underslun to give a 2D positioning system.
- Includes TITAN STEPPER DRIVE so control motion, with high precision and repeatability.

MOTION CONTROL

We offer complete solutions for motorized sliders: from single stepper motor with motorized pan axis to a complete system with the slider powered by servo drive and 3-axis PDMOVIE lens control motors, which are fully integrated with our systems.

The TITAN SLIDER comes with a range of accessories options, supports various head and is available with Peli case for easy mobility
